

VERIFICATION OPINION DECLARATION GREENHOUSE GAS EMISSIONS

To: The Board of Directors and Shareholders of Amazon.com, Inc.

Apex Companies, LLC (Apex) was engaged to conduct an independent verification of the greenhouse gas (GHG) emissions reported by Amazon for the period stated below. This verification opinion declaration applies to the related information included within the scope of work described below.

The determination of GHG emissions is the sole responsibility of Amazon. Amazon is responsible for the preparation and fair presentation of the GHG emissions statement in accordance with the criteria. Apex's sole responsibility was to provide independent verification on the accuracy of the GHG emissions reported, and on the underlying systems and processes used to collect, analyze and review the information. Apex is responsible for expressing an opinion on the GHG emissions statement based on the verification. Verification activities applied in a limited level of verification are less extensive in nature, timing and extent than in a reasonable level of assurance verification.

Boundaries of the reporting company GHG emissions covered by the verification:

- Operational Control
- Worldwide

Types of GHGs: CO₂, N₂O, CH₄

Scope 3 (Market-based¹): 61,904,955 metric tons (MT) of CO₂ equivalent (CO₂e) consisting of:

Purchased Goods & Services (Amazon corporate purchases made for Amazon's operations and services, Amazon branded products) (18,659,211 MT CO₂e)

Capital Goods (16,956,980 MT CO₂e)

Fuel-and Energy-Related Activities (5,692,306 MT CO₂e²)

Upstream Transportation and Distribution (11,008,652 MT CO₂e³)

Business Travel (1,042,116 MT CO₂e⁴)

Employee Commuting (2,980,789 MT CO₂e)

Downstream Transportation and Distribution (4,011,779 MT CO₂e)

Use of Sold Products (Amazon Devices) (1,522,608 MT CO₂e⁵)

End-of-Life Treatment of Sold Products (Amazon Devices) (30,514 MT CO₂e)

Data and information supporting the Scope 3 (Location-based)^{1,2,5} and Scope 3 (Market-based) GHG emissions statements were mostly historical and, in some cases, estimated in nature.

Period covered by GHG emissions verification:

- January 1, 2025 to December 31, 2025

¹ Location-based method (LBM) emissions are 66,201,920 MTCO₂e.

² Fuel-and Energy-Related Activities LBM emissions are 8,882,757 MTCO₂e.

³ A portion of Upstream Transportation and Distribution emissions were calculated using supplier-specific emission factors.

⁴ The majority of Business Travel emissions were calculated using supplier-specific emission factors.

⁵ Use of Sold Products LBM emissions are 2,629,122 MTCO₂e.

Criteria against which verification conducted:

- Amazon's Carbon Footprint Methodology
- Amazon's Devices Carbon Footprint Methodology⁶
- The Greenhouse Gas Protocol: A Corporate Accounting and Reporting Standard (Revised Edition) published by the World Resources Institute ("WRI") and the World Business Council for Sustainable Development ("WBCSD"). Reported Scope 3 emissions calculations are calculated in accordance with the methodologies in the Technical Guidance for Calculating Scope 3 Emissions; supplement to the Corporate Value Chain (Scope 3) Accounting and Reporting Standard, published by the WRI and the WBCSD.

Reference Standard:

- ISO 14064-3: Second edition 2019-04: Greenhouse gases -- Part 3: Specification with guidance for the validation and verification of greenhouse gas statements

Level of Assurance and Qualifications:

- Limited
- This verification used a materiality threshold of $\pm 5\%$ for aggregate errors in sampled data for each of the above indicators.

GHG Verification Methodology:

Evidence-gathering procedures included but were not limited to:

- Interviews with relevant personnel of Amazon;
- Review of documentary evidence produced by Amazon;
- Review of Amazon data and information systems and methodology for collection, aggregation, analysis and review of information used to determine GHG emissions; and
- Audit of sample of data used by Amazon to determine GHG emissions.

Verification Opinion:

Based on the process and procedures conducted, there is no evidence that the GHG emissions statement shown above:

- is not materially correct and is not a fair representation of the GHG emissions data and information; and
- has not been prepared in accordance with the "The Greenhouse Gas Protocol: A Corporate Accounting and Reporting Standard (Revised Edition)" published by the World Resources Institute ("WRI") and the World Business Council for Sustainable Development ("WBCSD"). Reported Scope 3 emissions calculations are calculated in accordance with the methodologies in the "Technical Guidance for Calculating Scope 3 Emissions; supplement to the Corporate Value Chain (Scope 3) Accounting and Reporting Standard," published by the WRI and the WBCSD (for the listed Scope 3 emissions).

It is our opinion that Amazon has established appropriate systems for the collection, aggregation and analysis of quantitative data for determination of these GHG emissions for the stated period and boundaries.

⁶ Includes the following Amazon-branded product lines' devices and accessories: Echo family, eero, FireTV televisions, streaming media players, sound bars, Kindle e-readers, Fire tablets, Ring, Blink, and Astro.

Statement of independence, impartiality and competence

Apex is an independent professional services company that specializes in Health, Safety, Social and Environmental management services including assurance with over 30 years history in providing these services.

No member of the verification team has a business relationship with Amazon, its Directors or Managers beyond that required of this assignment. We conducted this verification independently and to our knowledge there has been no conflict of interest.

Apex has implemented a Code of Ethics across the business to maintain high ethical standards among staff in their day-to-day business activities.

The verification team has extensive experience in conducting assurance over environmental, social, ethical and health and safety information, systems and processes, has over 20 years combined experience in this field and an excellent understanding of Apex's standard methodology for the verification of greenhouse gas emissions data.
